“Combining the skills of applying fractions, percentages and ratio....appeared to be demanding for many students, with many often only being able to work with one of the three skills but not all in a correct way.”

Examiners report Pearson Edexcel June 2024.

## Secondary TfM (Sustaining)

### Collaborative planning workshop

Combining the skills of percentages, fractions and ratio

#### Dates:

28 November 2024

23 January 2025

13 March 2025

#### Times:

13:00 – 16:00

#### Venue:

Online

#### Free online workshops starting 28 November

Join us, and teachers from across the GLOW region, to explore this key topic in greater depth and work together to develop carefully crafted lessons to share with your department.

You'll also leave with the tools and confidence to enhance collaborative planning within your own department.

Through the creation of a supportive, professional learning environment, collaborative planning makes the most of the skills, experience and resources within your team; promoting greater understanding and cohesion amongst colleagues, and a more consistent, confident experience for students in the classroom.

#### Register your place using the QR Code above

Workshops are open to all teachers of any school that has completed the first year of Secondary Teaching for Mastery (TfM).

\*The Maths Hub programme is free for State schools/colleges only. Fees apply for Independent/private schools.
